DETAILED ACTION

Claims 2-7, 9 and 11-12 are pending.

Election/Restrictions

Applicant's election without traverse of Group I, claims 2-7 and 11, in the reply filed on December 21, 2009, is acknowledged.

Claims 9 and 12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 21, 2009.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-7 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2-7 and 11 are rendered vague and indefinite for the recitation of "product" because it is unclear what type of product is being produced per se.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140

F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thornton*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2, 3, 4, 5 and 7 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2, 5 and 6 of copending Application No. 11/123,330. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are both drawn to products having improved immune function in mammals and the products contain the same lactic acid bacteria, *Lactobacillus reuteri*.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The claims are discussed above.

Copending claims are drawn to products for oral administration and nutritional products comprising *Lactobacillus reuteri*.

The claims of the instant case only differ from copending claims in the scope of the claimed subject matter because they both require products containing the same bacteria.

It would have been obvious to one of ordinary skill in the art at the time the claimed invention was made to provide for the pending claim products based upon a reading of the copending claims which teach similar products capable of improved immune function in mammals containing the same *Lactobacillus reuteri*.

Clearly one of skill would have been motivated by the copending claims to provide for the claimed products of the instant case. Thus, the claims are rendered *prima facie* obvious over the copending claims.

Response to Arguments

Applicant's arguments filed June 22, 2009, have been fully considered but they are not persuasive. The argument that there are two different sets of physiological and biochemical criteria for which to distinguish the instant claims over the copending claims does not change the fact that the same strain can inherently possess all of these properties whether they are claimed in the instant case or not because they have the same parent strain.

No claims are allowed.
